With the budget being delivered only a few days prior to the May Virtual Masterclass, we will provide a comprehensive overview of any proposed new initiatives which could affect your clients and business.</p> <p>Peter Kelly and Mark Teale, Centrepoint Alliance Knowledge areas: Superannuation, SMSF</p>

1.10pm 2.00pm	<p>Change in Government and so many other changes...</p> <p>The opinion polls suggest that at the next Federal election we will be getting a new Labor Government, and with this massive changes to the tax system. Limited negative gearing deductions, a smaller CGT discount, no refundable imputation credits, a minimum 30% tax on discretionary trust distributions, limited deductions for the cost of managing your tax affairs, less companies getting the 27.5% tax rate, increasing the highest marginal tax rate to 49%...</p> <p>So as long as we don't advise individuals, companies or trusts, and as long as our clients don't own capital assets, don't use debt, don't get franked dividends and don't get trust distributions then we don't need to consider what these changes will be (sarcasm!).</p> <p>In this session we will consider the effect of each of these announcements. And if we have time we will look at any other changes that are on the horizon.</p> <p>Ken Mansell, Tax Rambling Knowledge areas: Taxation</p>
